

Peptamen[®]

Complete nutrition to help you thrive

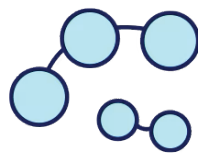

Designed to Deliver Superior Nutrition

Our 100% whey peptide-based formulas are thoughtfully made and scientifically proven to deliver nutrition that is well-tolerated and absorbed by those with GI impairment.

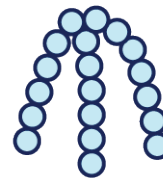

100% Whey Protein:

Whey is 'fast-acting' meaning it is emptied quickly by the stomach and then absorbed more efficiently in the small intestine.

Smaller Peptides:

The highest concentration of smaller peptides (protein fragments) — Di- and Tripeptides are shown to be easier to absorb and digest.

Medium Chain Triglycerides (MCTs):

High percentage of fat from MCT, which facilitates fat absorption and supports formula tolerance.

Peptamen[®] formulas are the ONLY peptide-based, nutritionally complete formulas that feature 100% whey protein, clinically proven to support tolerance and absorption for those with impaired GI function.

All Peptamen[®] formulas provide complete nutrition and at least 25 vitamins and minerals.

Adult Formulas

Peptamen®

Peptamen®

- 100% whey protein
- Designed for absorption & tolerance
- High percentage of fat as medium chain triglycerides

Peptamen® with Prebio™

- 100% whey protein
- Soluble fiber to support digestive health
- Available in vanilla flavor for oral and tube feeding

Peptamen® 1.5

- 100% whey protein
- For volume-restricted/high calorie needs
- Available in vanilla flavor for oral and tube feeding

Peptamen® 1.5 with Prebio™

- 100% whey protein
- Soluble fiber to support digestive health
- For volume-restricted/high calorie needs
- Available in vanilla flavor for oral and tube feeding

Peptamen AF®

- 100% whey protein
- Soluble fiber to support digestive health
- For volume-restricted/high calorie needs
- Omega-3 fatty acids for modulation of inflammatory conditions

Peptamen® Intense VHP

- 100% whey protein
- Soluble fiber to support digestive health
- For very high protein needs
- Omega-3 fatty acids for modulation of inflammatory conditions

Peptamen JUNIOR®

Pediatric Formulas

Peptamen Junior®

- 100% whey protein
- Designed for absorption & tolerance
- High percentage of fat as medium chain triglycerides

Peptamen Junior® PHGG

- 100% whey protein
- PHGG soluble fiber to support digestive health
- Available in vanilla flavor for oral and tube feeding

Peptamen Junior® Fiber

- 100% whey protein
- Blend of soluble and insoluble fiber for digestive health
- High percentage of fat as medium chain triglycerides
- Available in vanilla flavor for oral and tube feeding

Peptamen Junior® 1.5

- 100% whey protein
- For volume-restricted/high calorie needs
- Omega-3 fatty acids for modulation of inflammatory conditions
- Available in vanilla flavor for oral and tube feeding

Peptamen Junior® HP

- 100% whey protein
- For high protein needs
- PHGG soluble fiber to support digestive health
- Available in vanilla flavor for oral and tube feeding
